

Padvish®

**Padvish
DRM**

(Digital Rights Management)

Padvish DRM is a robust solution designed to safeguard your organization's sensitive documents and intellectual property through advanced encryption technologies.

This solution ensures that documents remain encrypted and protected, even when they leave the organization's network perimeter, preventing unauthorized access or modification. With comprehensive access control features, Padvish DRM enables administrators to define granular permissions for document access, ensuring that only authorized users can view or edit sensitive content.

It effectively protects your data from both internal and external security threats, providing peace of mind that your organization's confidential information is secure at all times.

Are you confident in the security of your organization's sensitive data and documents?

Ensure your confidential data and documents are protected against both internal and external threats with Padvish DRM.

Padvish DRM Unique Features

Unique Trusted App Protection

Padvish DRM Technologies

Asymmetric encryption on file creation
